

THE CLAIMS

Claim 1 has been amended as follows:

1. (Currently Amended) A patient monitor comprising:

a plurality of first hardware modules and first software modules connected to
sensors adapted for attachment to a patient, for processing signals
from said sensors;

an interface to which said sensors are electrically connected;

an ultrasound probe; and

a second hardware module and a second software module and a further
interface selected from the group consisting of an infrared interface and
a blue tooth radio path interface for wirelessly communicating with said
ultrasound probe, said further interface wirelessly communicating with
said ultrasound probe to receive signals from said ultrasound probe,
and said second hardware module and said second software module
processing said signals from said ultrasound probe.

2. (Original) A patient monitor as claimed in claim 1 wherein said interface
and said further interface allow addition of further hardware and software modules.

Claims 3 and 4 have been cancelled.

3-4. Cancelled.
